Aman Kumar

SDE Intern@Truminds Software Systems || CS Undergraduate, BIT Mesra '23

Prayagraj, Uttar Pradesh, India

Summary

I am a motivated undergraduate at BIT Mesra keen to work in organisations that bring excitement to innovation.

Besides the skills, I bring to the table an eagerness to learn and engage in collaborative interdisciplinary work.

Experience

Truminds Software Systems

SDE Intern

February 2023 - June 2023 (5 months)

Bengaluru, Karnataka, India

As a member of the front-end team for the project "Panasonic MirAle", I undertook the responsibility of crafting and refining various assigned screens within the application. To commence my work, I was provided with a comprehensive set of design mockups through a Figma link. Leveraging my skills in React-Native, I meticulously translated these designs into interactive and visually appealing screens. This involved implementing responsive layouts, incorporating smooth animations, and ensuring a seamless user experience. Furthermore, my role encompassed the crucial aspect of API integration. Collaborating with the back-end team, I successfully integrated the front-end screens with the necessary APIs, allowing for real-time data exchange and ensuring the functionality of the application.

Education

Birla Institute of Technology, Mesra

Bachelor of Technology - BTech, Computer Science · (2019 - 2023)

Don Bosco Public School

Senior Secondary, 82.3% · (2018 - 2019)
